Web Developer specializing in front end development. Experience with all stages of the development cycle for dynamic web projects. I have good experience with react framework and other tools using with it, recently I have been starting work with next-js. Strong background in project management

Experience

09/2022 - Until-Now

Front-End Developer

Future Code, Damascus

- Front-End developer using react framework.
- Create clean interface and simple, intuitive interactions and experience.
- Develop project concepts and maintain optimal workflow.
- Complete detailed programming and development tasks for front-end public and internal websites.
- Dealing with entire web development process (design – development – deployment).
- Dealing with API and testing api tool like postman.
- Write clean code and creating perfect api calling using advanced tool like RTK query and swr.

Projects

Almalk Platform, almalk.org

E-commerce platform specialized in renting and selling (real estate, cars, home-helpers, pets, educational courses).

Delivero Joud

It consists of seven dashboard to control a group of mobile applications belonging to the customer's application, which is an application for ordering products from different stores with delivery service.

I have worked on four of these dashboards (operations, quality, marketing, stores)

To follow up on orders and deliver them by delivery captains, follow up on their locations, and assign orders to them.

Hwayti

Mobile applications for school students I has worked on his dashboard system that show users and hobbies list in application, in addition add a new hobby.
